	FY 2000	FY 2001	FY 2002
	Actual	Estimate	Request
IMET	\$50,000	\$55,000	\$65,000

#### **National Interests:**

The International Military Education and Training (IMET) program is a low cost, highly effective component of U.S. security assistance that provides training on a grant basis to students from over 130 allied and friendly nations. IMET advances U.S. national interests through:

- further the goal of regional stability through effective, mutually beneficial military-tomilitary relations which culminate in increased understanding and defense cooperation between the United States and foreign countries;
- providing training to augment the capabilities of the military forces of participant nations to support joint operations and interoperability with U.S. forces; and
- increasing the ability of foreign military and civilian personnel to instill and maintain basic democratic values and protect internationally recognized human rights.

Training provided under the IMET program is professional and non-political, exposing foreign students to the U.S. professional military organizations, procedures and the manner in which military organizations function under civilian control. IMET's mandatory English language proficiency requirement establishes an essential baseline of communication skills necessary for students to attend courses. It also facilitates the development of important professional and personal relationships that have provided U.S. access and influence in a critical sector of society which often plays a pivotal role in supporting, or transitioning to, democratic governments.

A less formal, but significant, part of IMET is the Information Program that exposes students to the American way of life, including regard for democratic values, respect for an individual's civil and human rights, and belief in the rule of law. These are the key elements of the Expanded IMET (E-IMET) courses, which fosters greater respect for and understanding of the principle of civilian control of the military. E-IMET courses also exposes students to military justice systems and procedures and promote the development of strong civil-military relations by showing key military and civilian leaders how to overcome barriers that can exist between armed forces, civilian officials, and legislators. Finally, the IMET program introduces military and civilian participants to elements of American democracy: the U.S. judicial system, legislative oversight, free speech, equality

issues, and U.S. commitment to the basic principles of internationally recognized human rights.

### **Objectives and Justifications:**

IMET objectives are achieved through a variety of military education and training activities conducted by the DoD for foreign military and civilian officials. These include formal instruction that involves over 2000 courses taught at approximately 150 military schools and installations for roughly 10,000 foreign students. Continuation at this level of instruction will ensure IMET maintains its profound effect on the achievement of U.S. international affairs objectives.

The IMET program assists U.S. friends and allies in the professionalization of their militaries through participation in U.S. military educational programs. U.S. friends and allies have long recognized such training as essential for the progression of their own military leaders. IMET also contributes to strengthened regional friendships and enhanced self-defense capabilities. Finally, IMET and E-IMET effect institutional changes culminating in professional, apolitical militaries under civilian control.

The resulting military competence and self-sufficiency provides a wide range of benefits to the U.S. in terms of our national security interests and our regional stability goals. As foreign militaries improve their knowledge of U.S. military doctrine and operational procedures, military cooperation is strengthened. This cooperation leads to opportunities for military-to-military interaction, information sharing, joint planning, and combined force exercises that facilitate interoperability with U.S. Forces. Additionally, access to foreign military bases and facilities are notably expanded.

The following examples underscore how the IMET program supports the regional stability and democracy goals in a number of ways:

- Increased evidence and demonstration of militaries in fostering the promotion of civilian control of the military, improved civil-military relations, and support for democratization;
- Continued opportunities for military-to-military interaction, information sharing, joint planning, combined forces exercises, and U.S. access to foreign military bases, facilities, and airspace;
- Promulgated military regulations that improve military justice systems and procedures in accordance with internationally recognized human rights;
- Increased number of U.S.-trained foreign military and civilian personnel in military, defense ministry, and legislative leadership positions. Elevation of these students in positions of prominence within their government bureaucracy has a positive effect on support for U.S. policies:

## International Security Assistance

• Continued improvement of governments to utilize their defense resources, particularly U.S.-origin equipment, with maximum effectiveness, thereby contributing to greater self-reliance and interoperability with U.S. forces.

The following table shows the FY 2002 IMET request. Further information on individual country programs may be found in the respective country narratives.
